THE CROPS.

Crops in Missoria.—The rains of the last foring before that with this guin the could throw a shell of seventy pounds full of molten lend six miles, and even further, but six miles certainly. With such engines of destruction about, Bright, like a good, housel Quaker as he is, very wisely concluded that such fortifications as Lord Palmers, Spisual diseases, Timors, etc.—may be successfully the even with the prospects of good corn and hemp crops in Western Missonri. The Liberty, Clay county, Mo., Tribune, of Aug. 19th, says of the elf ets of the late rains: The Liberty, Clay county, Mo., Friotine, of Aug. 19th, says of the elf cis of the late rains:

We heatd an intelligent farmer say yesterday, that the corn crop in Clay will be larger than ever before. Whilst seme fields will turn out much less than a average, the greatly increased quantity of ground planted will more than make up for the deficiency. We shall have bread enough und to spare to our less favored neighbors, if we have any. The hemp crop in many pluces is very tine, but there will nevertheless he a smaller crop raised than last year. The crop of hemp, however, will be considerable, and will bring into the country many thousands of dollars. This, with the money that will be expended on our railroad (whilst we way our pathing of any nument for the spare of the colored Baptist church at Alexandria & T. Barron Vicier, a Parisian "monthred," who 19th, says of the ell cts of the late rains:

the money that will be expended on our railroad (whilst we pay out nothing of any moment for the present), will go far towards relieving the pressure of our people for money. The oat, wheat, and hay crops are a total failure, but the recent rains will give us a large crap of Hungurian grass, as well as potutoes, turnips, cabbage, and other fall vege ables.

Alexandria, Va.

The Baron Vigier, a Parisian "monderd," who married Cruvelli, the opera singer, bought haribadi's house at Nice, a short time since, for \$26,000.

Judge Douglas has telegraphed Io his friends in Chicago that he will be there early in September.

There are said to be from 1,600 to 1,800 guests There are said to be from 1,600 to 1,800 guests at the Greenbrier (Va.) White Sulphur Springs. The St. Joseph Gazette of the 13th says:

The parched earth has bind its thirst purtially slacked; yet more rain is still needed. The prospect is that we shall have an excellent season for seeding, and, as the time approaches for our farmers to enter upon this portion of their work, it is to be hoped they are proparing for extensive operations. Hould the breadth ever before sown should be put out this year. It is scarcely in the nature of things that another wheat crop should fail. Put in your seed, and rely upon it you will get a handsome return, and remember above all, that the whole experience of this country is that early seeding is the best.

Minnes du.—The Winona Republican of the The St. Joseph Gazette of the 13th says: loel H. Clayton, editor of the Menderson (N. C.) Pressage, died on the 9th inst. nes do .- The Winona Republican of the No less than 7,000 visitors were at Saraioga on Saturday and Sunday last. If the says: "Our farmers are now in the midst-1 their harvest, and a binsy time they are laving. The weather has been delightful, with rare exceptions, for two weeks past, and although every man, woman, and child in the country has been hard at work during that time, there is a great deal of grain uncut. We have heard it estimated that should one-third of the wheat crop is yet. Stern Punishment.—In a recent sermon upon the training of children, Henry Ward Beecher gave the following stern udvice to parents: "Nev-er strike a child on the head. Providence has ne ground, while of oats there has not to ex-one-half of the crop been cut, up to Monday, grain is perfectly ripe—indeed much too ripe;

will serve to secure the greater portion of the wheal and out crops."

The latest news from the capital is to the 5th. Tho long expected specia conducta left on the 3d for Vera Cruz. It consisted of \$3,600,000, when it left the city of Mexico, but it was expected that the abilition to be made at Puebla and all pa would bring the same to he about \$3,0000.
